Objective

A Machine Learning intern, who has experience in building end-to-end projects and able to build predictive models. Ready to apply my skills, work with a great team in an organization and simultaneously improve/update my skills in Machine Learning.

Education

B. TECH | 2017-2021 | GITAM UNIVERSITY BENGALURU

- Electronics and Communications Engineering

Skills & Abilities

PROJECTS

I have done many end-to-end projects related to machine learning, deep learning and web development. Some of them are:

- Morphed Image Detection using Deep Learning.
- A React Native App to create an authentication form using hand written passwords.
- Smart Attendance System using Deep Learning.
- Ecommerce website using ReactJS, Python Flask, MongoDB. I also applied Machine Learning techniques (Sentiment Analysis) for product comments/reviews.
- My other Machine Learning projects. hunnurjirao.netlify.app/mlproj

TECHNOLOGIES

Machine Learning · Deep Learning · Natural Language Processing · React JS · React Native · Python Flask · MongoDB

Experience

SAP SECURITY CONSULTANT | DXC TECHNOLOGY | JUNE-2021

- 1 Year Experience as SAP Security Consultant in DXC Technology.
